Standard Operating Procedure - ECG Machine

The following procedure is to be referred to by all staff members who carry out the procedure of cleaning an ECG machine. ECG machines must be cleaned after each use and on a weekly basis.

The following items are required to undertake this activity:
- Disposable gloves;
- White disposable apron;
- Bowl of warm water and general purpose (GP) detergent;
- Blue cloth;
- Paper towels.

Turn the machine off. Wipe over using the blue cloth and hot water and GP detergent. Dry thoroughly using paper towels.

Clean and dry thoroughly

Remove any unnecessary clutter/debris and continue cleaning as above

Clean and dry thoroughly

Clean wheels and legs. Dry thoroughly
