Standard Operating Procedure - Blood Pressure Machine

The following procedure is to be referred to by all staff members who carry out the procedure of cleaning a blood pressure machine. Blood pressure machines must be cleaned after each use.

The following items are required to undertake this activity:
- Disposable gloves – remember to wash and dry hands as per Trust policy when gloves and aprons have been removed on completion of the procedure;
- White disposable apron;
- Bowl of warm water and general purpose detergent;
- Disposable blue cloth and detergent wipes;
- Paper towels.

Wipe with damp blue cloth and dry thoroughly using paper towels

Wipe with detergent wipes and dry thoroughly using paper towels
